

Quality Policy

It is the aim of Australian Combined Resources trading as Skill Up Australia to manage and provide resources to national and international businesses.

The design, development and provision of business solutions to local and international organisations particularly in the areas of recruitment, training and assessment services form the scope of the quality system.

We provide strategic solutions through the delivery of nationally recognised training programs, staffing solutions, marketing, advertising and information technology.

Skill Up Australia is committed to providing a high quality of service to its clients. Implicit is the need to meet any regulatory requirements and to continually promote the achievement of this standard throughout all levels of the organisation. Ultimately the company seeks to exceed client expectations.

The ongoing development of our staff, the updating of our technology, and our extensive information networks will ensure that we are able to meet our client expectations.

All staff employed by Skill Up Australia are responsible for maintaining and monitoring the day to day operation of the quality system as it applies to their roles and within the limits of their responsibilities.

The Directors are responsible for the control and issue of this procedure.
